

10 *rule* 11. (Amended) A resistor comprising:
C3

11 a substrate having a longitudinal width greater than a length of said
12 substrate;

B 13 a pair of electrodes above said substrate and extending to opposite edges of
14 said substrate along said longitudinal width;

15 a resistor element situated between said pair of electrodes, said resistor
16 element including:

17 a pair of side sections, each coupled to a respective one of said electrodes,
18 and

19 an S-shaped section situated between said pair of side sections;

20 wherein a width of said S-shaped section is less than a width of each of said
21 side sections.

Please add the following new claims:

B3 1 15. (Newly Added) A resistor according to claim 1, wherein said
2 resistor includes only a single S-shaped section.

1 16. (Newly Added) A resistor according to claim 11, wherein said
2 resistor includes only a single S-shaped section.
